Gran Vitreous is a PC shmup that combines classic arena shooter gameplay with the mechanics of a loot driven action RPG. Upgrade your ships equipment and level up as you battle through a galaxy filled with randomly generated encounters. Gran Vitreous is a game that I will be updating as I progress. So don't forget to leave your comments and feedback. All updates and content posted on this thread can be seen on my Github repository here.

Please mark your PRs accordingly. The Foundation of Gran Vitreous The original concept for the game was to create a game that offered the same fun and excitement of Super Smash Bros 4 with the random generation of events and enemy placement that happened in roguelikes. In the course of developing Gran Vitreous, I started to experiment with different PC shmups and discovering the different mechanics and ideas that were thrown in with each. It wasn't until the last stages of development that I realised that I had created something unique in terms of its gameplay mechanics. I decided that I would rename my game Gran Vitreous and it was now time to tell you all

about it! The game is made with the Unity 5 engine and I intend to port it to other platforms in the future. I now have a whole second project that I plan to use as a means of testing and improving upon my engine for the future. Currently the game is in alpha. This means that the game is mostly fully playable and that I have a strong understanding of the mechanics. I have been spending time improving the game since release and will continue to in the future. As a reminder of how the game works: The game is broken up into four main play modes; Arena, Swarm, Wave, and Rogue. Arena: Gran Vitreous is best experienced in arena mode. The gameplay is very similar to Super Smash Bros 4. Arena is what I have chosen as the default gameplay mode for the game. If you want to learn the in's and out's of the arena mode, here are some of the main details. Arena mode is a one off mode, you play the game in one mode then you have to start over again with the next mode. You can't save between rounds. Ships that are in a flight mode are not affected by gravity. If you are doing anything with flight mode, you can hover in mid air and attack enemy ships. Arena

Fixed issues with the screen adjusting upwards causing difficulty with the first level. Added a few more wall touches (done by me). Thought I'd add this here for people wanting to use the free version of the game. If you own the full version you are of course able to enjoy all the features in the free version without any restrictions. The only thing that is affected is the gameplay and visual is now the same as the full version. Other than that just enjoy it as much as before because really it's a better game than the full version so don't feel like you're missing anything when you play it. Also, if you own the full version you get another copy of the game. The download for the free version is more than an install. An Occult Horror RPG is published here for the first time ever. Currently looking pretty bare bones, making it a great test bed for the potential of the project. I'm thinking of working on a demo version of the game to get it out there to the masses and hopefully see what they think of it. The numbers on the right are currently based on over 2,000 total views so far. Some things I plan on doing with this game... Add any bit I miss in the gameplay. Add in the characters so more of a story to go with the gameplay. Have some sort of character class system but not sure how to do it yet. Create a loadout to give the player choice to switch between classes that can alter the flow of the gameplay. Add things like a stats system and the ability to learn certain skills. Add more game modes. Currently only a single level but I'm thinking more levels. Add in a system to prevent players from being overpowered. This can work in multiple ways but more on that later. A way to give the players more control over their character which can be varied by the loadout (i.e. better skills that they can pick up) and different game modes. As you can see this is very much in the very early stages. I want this to be my personal project and even though the game is Free, I want the scope of it to be as large as possible. I'll be updating this thread with progress as I get it done. This game is currently being worked on using the ScummVM engine and is written in C#. Currently the game is

What's new in Jetpack Guy:

" (recorded in 1964); and "The Closer You Get," a duet with German artist Ilse DeLange, who also served as vocalist on "One Day My Prince Will Come." Swan Song's release of Last Fair Deal Gone Down and One More Red Nightmare sold in excess of 300,000 copies. The band made their final live radio appearance on Swiss radio on January 15, 1973, the day that Paul McCartney unexpectedly announced that he was leaving his band Wings and forming a new one. During their last public performance together, at the last week of February 1973, the entire band performed a more extensive concert rehearsal. With the band's windings down, Klein told the audience, "I think I owe you some money. So this is the last of these concerts you won't be getting

your money back from us." Post-breakup Winger spent some time with Klein following the band's break up; actually four days. Winger essentially squatted in an apartment owned by Klein and his partner, Matt Lane. Here, Winger met and formed a close friendship with Lane's ten-year-old son. The three ended up spending 20 years together. Though an amicable breakup, Winger's return to Europe and the US was not altogether successful. The commercial company which he and Klein had formed to market Winger's recordings was never formed. Instead, Klein separated himself from the former Winger to concentrate on his family and real estate businesses. Klein has since said that he has no regrets in allowing Winger to leave him and his record company. Though the final break up was amicable, during Winger's 1980s solo recordings, Klein called his former bandmate several times to tell him how much he thought his new recordings sounded like their last performances. He urged him to, "find some way to do the Spiders", even though his own band had disbanded nearly thirteen years earlier. Though Winger was never good at following through on Klein's advice, his subsequent recordings did include what might have been originally intended as Klein's metaphor. Most notably, on his extensive and successful 2009 release *When the Music's Over*, the opening song "In My Dreams" captures what Winger was at his very best - a world-class guitarist; innovatory, formally accomplished and with striking chord sequences. Music The origin of Winger is his fascination with guitar, which was evident in his earliest band, John's Children. As he stated

during a May 2001 interview (with
