GAME RATINGS Elden Ring is a RPG game for Android devices, has all the standard features for this genre, with the improvements required, having a fantasy theme, and being developed for Android. The collection of weapons, armor, and spells along with their corresponding abilities, that you earn throughout the game, are pretty different and varied. As there is no type of multiplayer game in Elden Ring is much fun to game with friends, and the online part, which allows to fight other players and play as one team, is pretty fun too. The game has a lot of interesting quests for you to complete, there are dungeons to explore and quite a lot of items to find. The online part is available in the game and it is pretty good, it allows you to connect with other players, and discover more about the Lands Between, while sharing the rewards with other players, and fighting, or joining in quests, with them. You can customize your character, and therefore, personalize its appearance, weight, race, and build. Anyways, this is better than RIFT 1st edition. As you will see both the ring images are unique for the ring of the corresponding character. So you can now go to your computer and customize your character according to your taste. And this time you don't need to run your character through a charm-making process.
